

User Guide

CODEx Filing Index

Overview

The CODEx filing index allows Inline XBRL (iXBRL) documents, such as company reports submitted to either Companies House or the Financial Conduct Authority (FCA), to be accessed and viewed using the CODEx Inline XBRL viewer. iXBRL is a standardised format for company reports that makes the information in the report available as structured data, making the report easier to find and analyse.

Key features include:

- Search by company name or company number
- Filtering by document date, filing date and registry
- Viewing the filing either directly, or using the CODEx Inline XBRL viewer

Search for filings

Enter any part of a company's name into the "Company Name" field or any part of a company's number into the "Company Number field", then click "Search" to find a company. Company number can include the Company Registration Number (CRN) or the Legal Entity Identifier (LEI). Select "Reset form" to clear search results and terms.

Beta This is a new service – your [feedback](#) will help us to improve it.

View XBRL data from any tagged company report

Extensible Business Reporting Language (XBRL) is a standardized way of tagging company reports, required by regulatory bodies such as Companies House and the Financial Conduct Authority (FCA). It helps organize company information so it's easy to find what you're looking for.

Search Filings

Company Name

Company Number

► [Advanced Search](#)

Search >

Please provide a company name and/or number.

Advanced Search (Filter)

Select “Advanced Search” for more search and filtering options, including document date, filing date and registry (either Companies House or FCA). Entering data in some or all of these fields filters search results after clicking the “Search” button. Click “Advanced Search” again to collapse additional search and filtering options.

Interacting With Search Results

Search results display the company name, LEI, document date and filing date. Clicking the LEI clears search results and enters the selected LEI into the company number field.

Click "Filing" to open the filing. Click "Viewer" to open the filing in the CODEx Inline XBRL Viewer. There may be a short delay when viewing a filing for the first time while the viewer is prepared.

CODEx Inline XBRL Viewer

Overview

The CODEx Inline XBRL (iXBRL) Viewer allows you to access, view and interact with tagged XBRL data in iXBRL documents from your web browser.

Key features include:

- Full text search on taxonomy labels and references
- View full details of tagged facts
- Export tables to Excel
- Visualise and navigate calculation relationships
- Produce on-the-fly graphs using XBRL data

Fact Properties

When an XBRL fact is selected, information about the fact will be shown in the XBRL inspector. This includes:

- Concept name
- Concept description
- Dimensions (if any)
- Date or date range
- Fact value
- Accuracy
- Scale
- Change
- Entity
- Concept
- Type
- Balance
- Concept Labels
- Concept References
- Anchoring information (if applicable)
- Calculations (if applicable)
- Footnotes (if applicable)
- Sections

Analysis charts

The icon next to the Date property will display a chart of the currently-selected fact compared against correspondingly-tagged facts from other periods in the report. If the fact has dimensions,

each dimension will also have an icon you can click to show a chart of the currently-selected fact compared against correspondingly-tagged facts with different values for that dimension. For example, if a dimension is used to provide a breakdown by business segment, the chart will show the correspondingly-tagged fact for each business segment. Dimensions shown on the chart can be toggled using the buttons below the chart. Up to two dimensions can be plotted at a time.

Change from prior period

The Change property shows the percentage change of the current fact compared to the corresponding value from the prior period, if such a tagged value exists. Clicking on the comparative period will focus the fact inspector on the prior period fact.

Entity information

The Entity property shows the entity identifier that the fact is reported against. Typically this will be the same for all facts in the report and will be either the UK Company Registration number or the Legal Entity Identifier. You can click the link to search the identifier on the Companies House or GLEIF website in a new browser tab.

Fact locations

If the current fact appears in more than one location in the document, the left and right arrow buttons at the bottom of the properties pane can be used to cycle through the different occurrences.

XBRL Inspector Panels

By default, the XBRL Inspector will show the Fact Properties panel, which shows information about the currently selected fact. The inspector has three other modes, which can be selected using the icons at the top of the XBRL Inspector:

- Document Summary

- Document Outline
- Search

To return to the Fact Properties panel, click on the same icon again or use the back button to the left of the panel title.

Document Summary

The Document Summary mode shows information about the XBRL data in the document, including the total number of XBRL facts, the number of hidden facts and files included in the filing. The summary also includes the number of distinct concepts, dimensions and members in the report. You can click on the fact count to enter Search mode.

Note that the number of concepts will be less than the total number of facts, as concepts will often be reported for different periods and with different dimensions.

Search

The magnifying glass icon toggles the Search panel, where a powerful search function allows you to find information in the document using XBRL data. By default, all XBRL facts in the document are displayed in the search results. You can use the search and filter controls at the top of the search panel to examine a fact or facts more closely.

Entering terms into the search bar of the Search panel shows a list of matching facts from the report. The search will match against information from the XBRL Taxonomy, including concept and dimension labels. The results are ordered according to match quality, with the best matches shown first. Entering multiple search terms will show all facts that match at least one term. Prefixing a search term with “+” will restrict the results to those that contain that term.

Selecting a fact in the results will scroll the viewer pane to that fact at its location in the document. Double clicking on a fact in the results or using the arrow icon will close the search panel and focus on that fact in the Fact Properties panel.

Search results can be customised using the filter functionality accessed using the filter icon to the right of the search bar. Apply filters by checking or unchecking boxes, by selecting the filter dropdown and making a selection, or by choosing an option from the filter category.

The filter icon will be highlighted to indicate when there are active filters, and a “reset” link will appear that will remove all filters. Clicking on the filter icon again will close the filter controls, but the filters will remain active.

Filters include:

- Concept type
- Fact value
- Hidden (or visible) facts
- Period
- Namespaces
- Types

- Units
- Scales
- Dimension type
- Calculations

Effect of exchange rate changes on cash and cash equivalents

Table Export

Tables containing XBRL tags have a green diamond icon in the top left corner. Mousing over this icon will show an “Export Table” link. Clicking this will export data from the table as an Excel spreadsheet.

The exported table will include the descriptions used in the document alongside the labels for the XBRL concepts and dimensions used to tag the facts in the currently selected document language. This feature can be used to review documents that have been prepared in a different language.

Toolbar Controls

Checking the “Highlight XBRL Elements” option on the toolbar will highlight all information in the document tagged with XBRL. The highlighting is colour-coded to indicate which taxonomy (or part of a taxonomy) was used to tag the fact. You can view a key for highlight colours by mousing over the question mark icon in the toolbar.

The toolbar also has the following controls:

- Dark Mode - selecting the dark mode icon at the top of the Fact Properties panel will toggle “dark mode”. Dark mode changes the interface to use light text on a dark background.
- Settings Menu - the gear icon on the right of the toolbar provides a menu with a number of viewer settings. These include:
 - Document language – if the XBRL taxonomy used to prepare the document contains more than one language, you can choose the language here to adjust the language used when displaying labels for concepts, dimensions and members.
 - Application language – this controls the language of the Inline XBRL Viewer user interface.
- Calculations mode - the “Calculations v1.1” checkbox controls how numeric facts in the document are checked against calculation relationships in the XBRL Taxonomy. It is recommended that Calculations v1.1 is enabled.
